

JAN ONDRICH MSc

Summary

Jan is an experienced professional in the infrastructure sector with specific expertise in the energy industry. Jan combines in-depth techno-economic knowledge with comprehensive understanding of market structures, trends, investment, and trading options. Over the past 15 years Jan has worked with senior management of institutional investors as well as strategic investors sourcing investment opportunities, creating business plans and presenting opportunities to senior management/investment committees.

Jan leads investment and asset management part of Amper Group where he focuses on origination and management of investment opportunities in renewable power generation and power grid services sectors. Earlier in his career Jan has advised large institutional investors on investments into infrastructure, such as combined power and heat generation as well as on energy efficiency and renewable energy opportunities. Jan has led or supported projects for Europe's major utilities, advising on institutional development, strategies, policies, regulation, market development and financing.

Jan is a graduate of London School of Economics (MSc in European Policy and Governance, 2005) and represents the City of Prague on supervisory board of Pražská Energetika Holding.

Jan acts as a board member responsible for finance of a charity Act for Others which supports handicapped children in the Czech Republic.

Jan is a Czech national fluent in verbal and written English and has working knowledge of German.
